

ALUBRITE

Technical Data Sheet

ALUBRITE is an exclusively formulated, powerful condenser coil cleaner with a combination of acids and surfactants. Its foaming action removes stubborn deposits of grime. It is a very effective cleaner and brightener providing maximum efficiency to the air conditioning system.

HOW TO USE: Dilute ALUBRITE with 1 to 3 parts of water. Turn off the unit. Wet the coils and spray ALUBRITE from top until all areas are thoroughly wet with it. Allow it to act for 5 to 10 minutes. Rinse well with water to completely remove all grime and AUBRITE from the unit.

BENEFITS: ALUBRITE prolongs condenser life and restores peak cooling efficiency. Economical ALUBRITE diluted with water and applied by simple spray, saves time, labour, expensive equipment replacement costs, and downtime.

PRECAUTIONS: Avoid contact with skin, eyes & clothing. Wear chemical resistant gloves, goggles and clothing.

FIRST AID: In case of skin contact, wash affected area with soap and water. In case of eye contact, flush with plenty of water for a minimum of 10 minutes. In case of Ingestion – DO NOT induce vomiting. Drink plenty of water. In case of inhalation remove to fresh air

WARNING: Contains Hydrofluoric Acid. Harmful or fatal if swallowed. Contact with skin or eye may cause burns. Avoid breathing vapors. Keep out of reach of children. Refer to MSDS before using the product

SPECIFICATION

Appearance :Clear Liquid
Colour : Pink
Odour : Mild Acid
SG : 1.05

Shipping Information: Hazardous for shipment by air, sea, rail and road.
